**UVO**

**MO BOX**

## UVO Group

UVO was founded in Hong Kong in 2017, that is a cutting-edge brand enterprise headquartered in Hong Kong that focuses on interior and exterior wall and smart modular space product system, integrating technical R&D, design, innovation, sales and services.

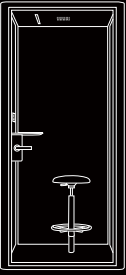

Through in-depth understanding of the international mainstream space product concept, and through full market research on the local Asian market, especially in view of the use habits of the Greater China and Southeast Asia market, we have developed a number of indoor and outdoor wall and smart modular space product systems, which perfectly interpret the brand concept and market positioning of UVO.

## MO BOX

UVO team has focused on the development of offices planning and implementation for years. The ideal office environment should be a total solution for enterprises, employees and owners, rather than intractability. MO BOX breaks down from the traditional concept, it is an integrated module, considering the function and personnel headcount in each space, and the four elements of lighting, electricity, sound insulation and ventilation.

As a whole, it offers the advantages of timeliness, convenience, mobility and reusability. It makes the layout of office space as simple as building blocks. When function or space needs change, reconstruction takes just a few days. Currently, we have choices of standard MO BOX rooms in different sizes, they can satisfy single person or multi-person coworking needs. At the same time, rooms can also be customised with different themes and sizes to meet more personalized requirements depending on the function of the space.

# Phone

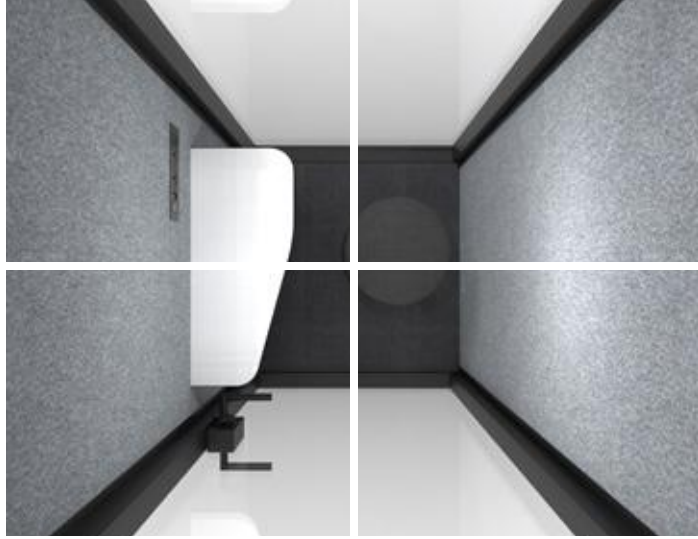

**LISTEN** to the call from the heart.

Phone gives you the privacy you need to conduct a focused conversation.

A perfect studio with soft light, fresh air and convenient power socket brings incomparable experience to users who need a break-time from the noisy world.

## Vertical View

Outer:W950\*D950\*H2200/2320mm  
Inner:W820\*D820\*H2070mm

Phone collection is for privacy workspace . A highly insulated sound system allows you to talk freely and avoid interrupting noises, while also ensuring privacy. The space utilization is high, and it can be dismounted, moved and re-built circularly. When user need to work alone , think , or call , Phone is undoubtedly the best choice . It's as simple as putting up a "Do Not Disturb" sign . Simply go into the Phone to find your own time.It offers a great space for a Phone caller private work. Keep the office flexible and take privacy with you wherever and whenever you want.

# Solo A

From a different perspective, there may be different perspectives on work. Change your work posture at any time and take some time to breathe during busy time.

# Solo

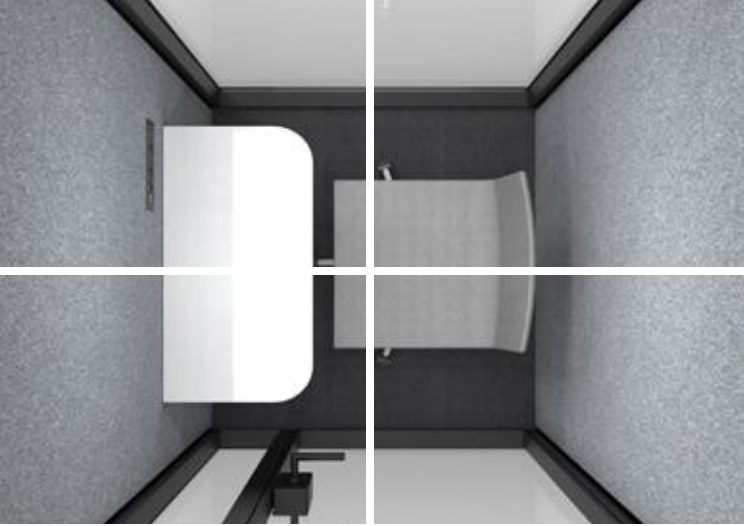

**LEARN** to explore by yourself . When we graduate from school and enter into society, the first skill we need to learn is independent thinking. Just like the guitar Solo, it brings a breath taking melody to the audience.

Outer:W1200\*D1200\*H2200/2320mm  
Inner:W1070\*D1070\*H2070mm

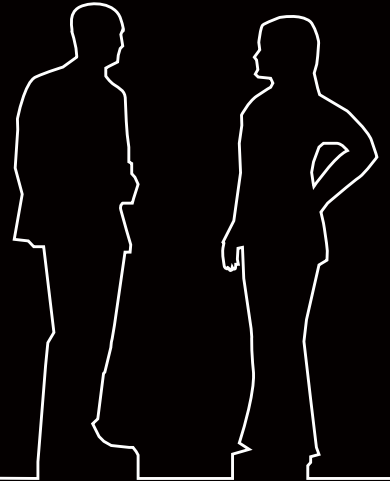

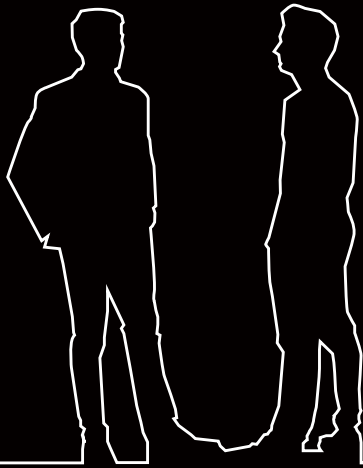

## Vertical View

Unlike the Phone , which focuses only on call making , Solo can be used in a more integrated way , both as an enhanced Phone Booth and as a mobile work platform. When illuminated by the fascinating LED system mounted with the ceiling module , the user can be seen in a dreamy office space,complete with a comfortable fresh air system,and feel free to stay in Solo all day. Every time we sit in a solitary space and think , we are rewarded with a precious result of thought . It's time to let go of your mind and embrace a new life.
